- **Be Yourself Week**
- **Students' Achievements**
- **NHJS Stepping Stone and Open House**
- **School Fees AY 2023/2024**

The NH Career and Education Fair 2022 is happening this week, Friday, 14 October 2022, onsite for the first time after the two-year pandemic lockdown. The theme for this year's event is "Reshaping Career Choices in a Post Pandemic Employment Market" which is timely and apt for the occasion because it would allow us to understand not only what the pandemic has brought to society, but how it drastically changed our way of life, and its impact to the professional landscape. This will help teachers and parents to shape and prepare our students for their work and everyday life in the future.

It is indeed crucial to see the impact of the pandemic to the society at large, especially in terms of both educational and professional perspectives. We can guide our students properly on their educational choices and interests, maximise learning opportunities, and equipping them with the necessary skills and mindset. If there is something to be learnt from the last two years of the pandemic, our lives can be easily upended. It is imperative therefore to be able to survive, carry on and flourish. The pandemic has accelerated many changes in jobs and in the workplace, reshaped trends and facilitated the emergence of careers. The greatest downside came for those unprepared - businesses, jobs and skills that required physical proximity were devastated as it caused people to lose jobs or to be furloughed and businesses to close. Examples of these are workers working in non-essential manufacturing firms, restaurants, tourism, and entertainment.

While the world braced itself for the economic plunge, amid this pandemic, there was an unprecedented growth in digital technology as everyone shifted to the virtual world to augment the various in-person activities that was disrupted because of lockdowns. The virtual world became busier, compared to pre-pandemic times, as everyone turned to their electronic gadgets to continue to be connected with each other. This accelerated the transformation of the digital technology and has enabled the development of new ones.

### UPCOMING EVENTS

#### October

**4/10-16/11** Cambridge Exam

**15** SC: Hideaway

**24-25** Y5 ANBK

14-20 OCTOBER 2022

Therefore, development in digital technology will continue to expand as the pandemic continues to recede. Pre or post-pandemic, digital technology is needed in almost everything because it “changes the pattern of economic operation, as it enlarges business scale, increases economic efficiency, improves user experiences, reduces operating costs, and controls financial risks”.

This pandemic has taught us that digital technology is crucial in stabilising the sudden disruptions in the various aspects of people’s lives, as we shifted most of our economic activities online. In the post-pandemic society, digital transformation will be further accelerated, and we will continue developing in this field, thus making careers related to this lucrative. It will also open more opportunities for students in the present to create new forms of digital technology in the future. As years go by, there will be more advancement in technology and the need for more technical know-how, making university majors in digital technology more sought after, such as data science, computer programming and engineering, robotics and AI, software/app development and more.

By referring to the info graph below, as summary of the data gathered by LinkedIn, Coursera and the World Economic Forum, you will notice the emergence of mostly digital technology careers that will remain to be growing in demand.

## Job Landscape

By 2025, new jobs will emerge and others will be displaced by a shift in the division of labour between humans and machines, affecting:

97 million

85 million

#### Growing job demand:

1. Data Analyst and Scientists
2. AI and Machine Learning Specialist
3. Big Data Specialists
4. Digital Marketing and Strategy Specialist
5. Process Automation Specialists
6. Business Development Professionals
7. Digital Transformation Specialists
8. Information Security Analysts
9. Software and Applications Developers
10. Internet of Things Specialists

#### Decreasing job demand:

1. Data Entry Clerks
2. Administrative and Executive Secretaries
3. Accounting, Bookkeeping and Payroll Clerks
4. Accountants and Auditors
5. Assembly and Factory Workers
6. Business Services and Administration Managers
7. Client Information and Customer Service Workers
8. General and Operation Managers
9. Mechanics and Machinery Repairers
10. Material-Recording and Stock-Keeping Clerks

CELEBRATING THE COMMUNITY

14-20 OCTOBER 2022

## Other Jobs of the Future

Here in Indonesia, the situation has been looking “normal” for the past few months but many questions still remain as people grapple with the post-pandemic return to the physical workplace and the job opportunities available for those applying. For one, will the workplace be the same as before? Will workplaces be made more flexible? Businesses have learnt that in-person interactions, can be reduced through a mix of virtual and in-person communication, without the loss of productivity. Will this likely to continue or will they mandate the same format as the pre-pandemic era? What will be the threats or opportunities here?

To help our students with this search, the World Economic Forum (WEF) has listed down 10 “Jobs of the Future 2030”, besides popular or known digital technology majors that attractive possibilities in the future, and they are enumerated below:

1. Work From Home Facilitator
2. Fitness Commitment Counsellor
3. Smart-Home Design Manager
4. XR Immersion Counsellor
5. Workplace Environment Architect
6. Algorithm Bias Auditor
7. Data Detective
8. Cyber Calamity Forecaster
9. Tidewater Architect
10. Human-Machine Teaming Manager

## Skills Needed to Succeed Not Only the Pandemic But an Ever-Changing Environment

While it is good to know that there are many possible careers you can embark on the future, one must also understand that there is a need to demonstrate certain skill sets that will also not only to make you employable in the future but also enable you to become steadfast in the midst of ever-changing world. After the pandemic, professional skills and expectations have been impacted in the same way that the nature of the jobs or professions have changed. One must possess the necessary soft-skills, not only the hard-skills.

The article below presents five skills needed to succeed in this fast-changing world:

(This article was taken from:

<https://www.topuniversities.com/student-info/careers-advice/future-skills-youll-need-your-career-2030>)

In 11 years' time, the year 2030, it's highly likely you'll be working in a job that doesn't even exist yet – and no, we're not talking about building flying cars or developing the world's first time machine. The world of work is evolving quickly, which means you have to figure out how to prepare for a future job role that's impossible to predict.

2022-2023

**CELEBRATING THE COMMUNITY**

14-20 OCTOBER 2022

Of course, there isn't a crystal ball that can tell us exactly what skills will be needed and what won't be needed. However, with the help of the University of the Witwatersrand, we've come up with five skills we believe you'll need to succeed in your future career, whatever it ends up being.

## **Cognitive flexibility**

The rise of digital technologies means you're going to need to be able to handle the plethora of opportunities and challenges that come with it. Do you have the ability to adapt to change and conceptualize complex multiple ideas all at once? If so, you're showing qualities that reside in advanced multi-taskers and which are highly valued by employers and recruiters.

## **Digital literacy and computational thinking**

As the world continues to rely on highly technical and continuously evolving technologies, the need for those with the digital skills to match also increases.

You've most definitely heard of STEM, but have you heard of SMAC (social, mobile, analytics and cloud)? Although it may seem like we're being bombarded with digital buzzwords, being digitally literate offers capabilities beyond what was once thought possible when it comes to emerging technologies, such as artificial intelligence (AI), machine learning, Internet of Things (IoT), and data science.

"We need to train scholars to deal with the challenges of the 21st century, some which we may not yet have encountered," says Professor Adam Habib, Vice-Chancellor and Principal of the University of the Witwatersrand.

"We need to work across sectors to develop the technology required for us to leapfrog across eons of poverty, unemployment and inequality, and in so doing to create a new world order that prioritizes humanity before profits and power."

A master's degree in artificial intelligence or e-Science can help advance your digital skillset and accelerate your technical acumen in these emerging fields, from learning about data visualization and exploration, to computational intelligence, and natural language technology.

## **Emotional and social intelligence**

For everything that can be replaced by digital technologies and artificial intelligence, emotional and social intelligence remain uniquely human capabilities.

In some sectors, these qualities are absolutely crucial. The demand for jobs in healthcare, for example, are on the increase - demonstrating how some roles will always require a human element. Your future job is more than likely going to include working closely with others, so having empathy, the ability to collaborate, as well as excellent communication skills is something you're most definitely going to need.

## **Creative and innovative mindset**

Despite a report by the World Economic Forum in 2018 suggesting robot automation will create more jobs than they displace, you'll still do well to keep on top of your creativity skills and maintain an innovative mindset. Much like having an excellent sense of social intelligence, natural creativity is something which can't be easily replicated by the latest digital technologies. As long as you can think outside the box, you'll be just fine.

2022-2023

**CELEBRATING THE COMMUNITY**

14-20 OCTOBER 2022

It is worth mentioning that the pandemic has taught all of us a valuable lesson that we can use to navigate the future. It was a hard lesson but the pandemic was the mechanism of change that enabled people to view education and work in an entirely new light. To be able to survive and flourish in a fast-changing world and a future full of uncertainties, it is not just the degree, technical skills or educational attainment that matter but also soft-skills and great character traits.

In the post-pandemic era, where the birth of a “new normal” will challenge the way we do things, companies will treasure individuals who can form very good relationships and communicate well with team members and other colleagues. Where talents will not be necessarily geographically in the location of the workplace in the future because they can work virtually in a hybrid system, companies will need people who can maintain good connections with others despite the reduced in-person interactions.

## PE Department's Articles

### SOCCER FRIENDLY MATCH: NHJS vs ACG

On Saturday 1 October 2022, our boys soccer teams U10 and U18 were invited to play friendly matches against ACG School in Warung Buncit in South Jakarta.

After two-years of pandemic lockdown, our players - U10 (15 players) and U18 (15 players) and their parents were excited to participate in the games. In the morning of the matches, our players looked sharp and ready to perform their best.

Both teams played well and here are the final score of the matches:

NHJS U10: Draw 1 - 1

NHJS U18: Lost 1 - 0

U10 NHJS (ORANGE) VS ACG(BLUE)

U18 NHJS (GREY) VS ACG (WHITE/YELLOW)

Although neither team managed a win, it was overall a very good start for all players. Both teams are keeping their spirits high and are motivated to keep up with trainings and prepare for the next friendly match or competition.

We would like to thank all parents who brought their children punctually to the soccer pitch and for their support during the games. And also to Coach JP for organising the matches and Mr Bambang for supporting the coaching and training activities.

We look forward to seeing you in our next game.

### BINUS CUP 5-8 OCTOBER 2022

On October 5th to 8th our school's competitive teams competed in the BINUS CUP 2022.

The teams competed in the following games:

1. Badminton (Men's Doubles Open Level)
2. Soccer (Middle School and High School)
3. Basketball (Middle School and High School)

## CELEBRATING THE COMMUNITY

14-20 OCTOBER 2022

Here are the results:

### Badminton

Aiden Angriawan and Ken Huang of Y7I played in the Men's Doubles Open Level and achieved 4th place after they lost against high school students from Nanyang School.

### Basketball

NHJS Middle School boys team achieved 3rd place after they won against ICM School. NHJS High School boys team lost during the qualifying round.

### Soccer

NHJS Middle School boys team emerged Champion after winning the match against the host team, BINUS Simprug. NHJS High School boys team defeated Raffles Christian School and emerged Champion.

Congratulations to all the players and coaches! The teams are very motivated by their achievements and will continue to train for the next tournament.

KEEP YOUR SPIRITS GUYS!!

14-20 OCTOBER 2022

## Be Yourself Week

On 3rd to 7th of October 2022, the Student Council held its very first in-person event after two years, Be Yourself Week! As usual, it is a five-day event where students are able to express themselves and demonstrate their inter personalities based on the different themes chosen. The themes this year consisted of Crayola (Monochrome) Monday, Stereotype Tuesday, Pyjama Wednesday, Twin Thursday, and Heroes vs. Villains Friday.

After such long periods of HBL, Be Yourself Week was met with unmatched enthusiasm, as it felt good to get back face-to-face events and see everyone dressed up in their unique outfits! Seeing students with their bright and creative costumes definitely put a smile on everyone's faces. To everyone's delight, there were even staff that went along with the themes, showing up in their pyjamas and twinning with other teachers. Ultimately, the event was a success with the eager participation of students and the strong support of staff.

And of course, we couldn't forget the newest addition to BYW, the Photo Spot! With a giant polaroid frame and a shelf of cute props to choose from, students from Primary all the way to JC enjoyed snapping pictures to look back at with their friends.

Last but not least, we can't leave out the highlight of the week, the Fashion Show! With the theme of Heroes Vs. Villains, the Primary division showed up in colourful group ensembles, such as characters from Marvel, Star Wars, DC, and more! On the other hand, many classes from the Sec & JC division put a creative spin on the theme, dressing as Cinderella against her stepsisters, Andrew Tate versus feminists, and Scarlet Overkill from Despicable Me. The teamwork exhibited by all students (both off and on stage) truly made these performances even more memorable, as the effort put into the props and videos really shone through in the end.
