## “ “ DEAN’S ARTICLE

A dynamic and vibrant third term is coming to a close. Last week, our school successfully held the 7th Chinese Language Recitation Competition. The purpose of this competition is to promote the use of the Chinese language through recitation. Although there are different channels for learning Chinese in Indonesia, the percentage of those who can actually use it for communication in daily life is still quite small. Some students may have opportunities to communicate in Chinese on campus, but the chances are limited at home or while shopping unless everyone in their family speaks Chinese. Therefore, I encourage students to watch Chinese films, TV shows, and read Chinese books and magazines.

There are also many online Chinese learning software available, such as Pongdy Reader, which sponsored this year’s Chun Sun Cup and provides a great learning platform for students to learn to speak Chinese. Parents and students are welcome to try it out : <https://reader.pongdy.com/cn/>

The Chroma Week art festival this week is also not to be missed. Before preparing for this celebration, teachers from the music and art departments had to constantly practice and prepare with their students. On Monday, we saw the students art works displayed in the hall and cafeteria, as well as the music performances by the high school students. This is the first Chroma Week, and students from different grades have formed the activity committee to assist the music and art departments. In addition to providing a platform for students who love art and music to showcase their talents, Chroma Week also allows more students to appreciate music and art. We wish this event a complete success, and we would also like to thank the teachers for their cooperation and the parents for their support.

On Saturday, March 11th, there will be an art workshop in the Multipurpose Hall (MPH) in the morning, and students and parents are welcome to attend. The music concert will be held in the afternoon, with the first performance starting at 1:30 pm and the second performance at 3 pm.

This semester, Tanjong Katong Secondary School in Singapore has invited our school's Year 8 students to visit Singapore for offline exchanges in April. This activity is mainly open to 20 students from the eighth grade and will last for 3 days and 2 nights. We hope that Year 8 students will actively participate.

In the final week, we will welcome the Year 7 Milestone Program, which is also the first outdoor activity for Year 7 students after the pandemic. Through this three-day and two-night activity, we hope to help students understand their strengths and weaknesses and inspire them to seek their own goals.

Finally, I wish everyone a happy holiday!

Spring is the first of the four seasons and the season of rebirth and vitality in nature. Chun Sun, which means bamboo shoots, represents the vitality and energy of spring, bringing hope and strength to people. Chun Sun Cup, which has been around for a long time. This year is the 7th Chun Sun Cup, which was held as a Chinese-language recitation competition, welcoming outstanding students of Chinese language learning and like-minded Chinese teachers. Together, we appreciated the profound connotations of excellent poetry and the charm of Chinese-language recitation.

Let us look forward to the future and the great achievements of all excellent participants in their Chinese language learning and recitation art, creating a more brilliant future. Chun Sun symbolizes the beauty of spring and will always flourish in the sky of Chinese language learning and recitation art!
